

Corrections to Enumeratio renovata Coleopterorum Fennoscandiae, Daniae et Baltiae

Hans Silfverberg

The latest checklist of northern European Coleoptera was actually published in 2011 (Silfverberg 2010). The publication came with some unfortunate errors, for which a correction is presented here:

- p. 30. *Aleochara kamila* is the valid name, *A. diversa* a synonym (junior homonym).
- p. 46. After genus *Hypnogyra* should come genus *Leptophius* Coiffait, 1983, with species *L. flavocinctus* (Hochhuth, 1849), from Latvia and Lithuania (cf. Silfverberg 2004).
- p. 72. *Cryptophagus insulicola* is a separate species, reported from Denmark (cf. Pedersen & al. 2010).
- p. 75. *Coccidula rufa* should also be listed for Lithuania (cf. Silfverberg 2004).
- p. 78. The name should be written *Stephostethus pandellei*.
- p. 86. *Notoxus trifasciatus* is a separate species, reported from Denmark (cf. Pedersen & al. 2010).
- p. 89. *Stromatium unicolor* should be listed as an import species for all the mentioned countries.
- p. 101. After *Apion immune* should come *A. punctirostre* Gyllenhal, 1839, from Lithuania (cf. Silfverberg 2004).
- p. 106. Smicronychinae should be Smicronychini.
- p. 114. *Xyleborus bodoanus* is a separate species, reported from Sweden and Denmark (cf. Pedersen & al. 2010).

Additionally the following species, although listed as having been reported from Finland (p. 131), stood without an F in the main list:

Megarthus hemipterus
Gabrius piliger
Cryptophagus intermedius
Mordellistena secreta.
